Delivering Tomorrow's Solutions Today

Compliance Without the Spreadsheet Risk

IFRS 16 COMPLIANCE

A practical path to automated, audit-ready IFRS 16 lease accounting — built on the ERP you already run.

The problem: Every lease modification, renewal, or rate change forces a fresh recalculation of the ROU asset and lease liability. At enterprise scale, spreadsheets can't track that volume — or prove it to an auditor.

GOING FROM SPREADSHEETS TO AUDIT-READY IN THREE STAGES

How automated IFRS 16 lease accounting replaces the manual workbook model

The Manual Reality

One master workbook, constantly edited

- ▸ Complex, sprawling spreadsheets
- ▸ Manual recalculation on every change
- ▸ No system-logged audit trail

The Automated Fix

Runs within the existing ERP environment

Configure → Migrate → Go Live

- ▸ Single source of truth for all leases
- ▸ Automated recalculation on modification
- ▸ Every change system-logged

The Audit-Ready Outcome

IFRS 16 · SOCPA-aligned reporting

Evidence ready in seconds, not days

- ▸ Accurate ROU assets & liabilities
- ▸ Automatic journal posting to GL
- ▸ Defensible records for any audit

THE RISK

- Manual recalculation
- No audit trail
- Error-prone re-keying

THE FIX

- Configure → Migrate → Go Live
- Runs on existing ERP
- No new license needed

THE OUTCOME

- Audit-ready in seconds
- Automatic GL posting
- IFRS 16 & SOCPA aligned

WHY ennVee

25 Years
Oracle Partner

ennGage
Proprietary rapid-deployment methodology

40+
Sub-domains of finance & ERP expertise

Our consultants average 20+ years of ERP experience and are certified across Oracle Financials, project management, and information security — the same practice that built the automation shown below.
