

ennVee JD Edwards Health Check

Unlock the latest advances in JD Edwards
for system improvements

Key Benefits

- Understand core issues impacting the ability to benefit from JDE capabilities.
- Own a plan and timeline to address issues.
- Identifying user skills gaps and training requirements.
- Leverage innovations with features and functionality from latest releases.
- Maximize your investment in JDE.

You may be challenged with functional and technical issues in JD Edwards that are hampering your ability to focus on your business. A JD Edwards Health Check helps you leverage your current functionalities while unlocking the latest advances for immediate improvement.

With this essential evaluation process, you can optimize your JD Edwards investment for future growth. We tailor the Health Check to focus on what is important to you and your business.

Our JDE Health Check team will collaborate with your team to evaluate and make recommendations towards optimizing your system, including sharing time and cost estimates.

Three-step Process

Review Current System

Checking JDE-related processes, licensing and modules.

We interview key stakeholders and users, host discussions with functional leads and subject matter experts.

Our technical experts will review your technical architecture and configuration.

We evaluate functional configurations and setups to look for efficiencies and issues.

Analyze Current Processes

Identify gaps in training, processes, or configuration and assess opportunities for improvement.

Gap analysis and improvement opportunities based on impact and priority.

Opportunities to automate business processes, remove customizations and leverage vanilla code and setup, wherever possible.

Validate business processes against best practices.

Final recommendations and next steps.

Actionable Recommendations

Provide a plan and make recommendations to address issues with priority and effort.

A summary health check report presentation, including findings, benefits, and cost/timeline to implement changes.

ennVee JD Edwards Health Check is tailored to meet your specific needs. It covers both Functional modules and Technical foundation.

Functional Modules
